

First of all, we would like to note we have all watched the required Trustlands video.

PUBLIC INPUT

-Still no 20 mph zone in front of the school

Spencer will call Jed Alimary (435) 716-9642 to hopefully move this along

-The Latino Community has suggested students having the opportunity to "check out" an iPad to practice Reflex Math, etc. at home

Concern: the iPads would need data plans since most of the households would not have internet

Possible solution: does Comcast have a program for free internet?

Alternative: look into creating a "Homework Club" where the students could access this after school with a trained adult there to help - this would save us money on devices and would eliminate the concern of sending equipment home without insurance

STEM SCHOOL DESIGNATION UPDATE:

The prequalifications have been completed. The STEM committee is currently working on a portfolio to present to the state in January (Spencer will e-mail the exact date).

ADD A "COMMUNITY COUNCIL CORNER" TO THE PTA NEWSLETTER:

CariAnn Saurey has volunteered to ensure the public is aware of celebrations and topics from our meetings by including a segment in the PTA Newsletter.

THE LIBRARY WILL BE GETTING 10 NEW IPADS!

The council has voted and Mrs. Merritt will receive funds for iPads for research!

FOR NEXT MEETING:

We need to include the remaining balance of funds at each meeting, possibly even on the agenda.

We will look at the Snap Map Plans for our area
